MUHAMMAD IMRAN HAKIM BIN ABD RASHID

Kota Bharu, Kelantan, Malaysia | +60 11-1980 9130 | imranhakimit02@gmail.com | linkedin.com/in/imran-hakim

PROFESSIONAL SUMMARY

Final-year Bachelor of Information Technology (Informatics Media) student with a 3.68 CGPA and hands-on enterprise experience in IT infrastructure, technical support and full-stack web development. Experienced in structured network cabling, endpoint provisioning, Windows OS deployment, hardware and software troubleshooting, PHP/MySQL development and relational database design. Developed internal business applications at Leader Energy, including a cross departmental ticketing and workflow system and a project monitoring system. Strong foundation in IT operations, application support, system testing and troubleshooting, with an interest in building a career in IT infrastructure, systems or application support.

EDUCATION

Bachelor of Information Technology (Informatics Media) 2023 – 2027 (expected graduation)
Universiti Sultan Zainal Abidin (UniSZA), Terengganu | CGPA: 3.68 | Dean's List (Semesters 1, 3, 4, 5, 6)

Diploma in Information Technology 2020 – 2023
Universiti Teknikal Malaysia Melaka (UTeM), Melaka | CGPA: 3.42

WORK EXPERIENCE

IT Support Intern | Leader Energy Group Berhad Aug 2026 – Mar 2027
George Town, Pulau Pinang

- Built and deployed two internal PHP/MySQL applications: a project monitoring system coordinating nine departments and a ticketing system centralizing HR and Finance requests (see Projects).
- Prepared corporate laptops and endpoints for employee use through Windows 10/11 reimaging, BIOS/boot configuration, driver installation and software setup.
- Resolved hardware, software and access issues for internal users, restoring access to devices, applications and network services.
- Established and verified server-room network connections through RJ45 termination, patch-panel installation, cable testing and connection tracing.

IT Assistant Intern | Universiti Teknikal Malaysia Melaka (UTeM) Jun – Aug 2022
Melaka

- Improved usability of the U-CREDs learning management system, serving 300+ students and faculty, by implementing interface changes that supported access to learning resources.
- Identified system defects and data inconsistencies before deployment through system testing and data audits covering 100+ production assets.

PROJECTS

Flowdesk User Request Ticket System | Leader Energy

- Implemented relational database schemas, JSON-driven dynamic forms and multi-tier approvals in PHP/MySQL for 2+ departmental workflows, including HR support and Finance invoice submissions.
- Integrated request categorization, priority selection, document uploads and automated workflow processing to centralize employee submissions and request tracking.

Business Development Project Monitoring System | Leader Energy

- Implemented three access roles (Requester, Staff, Approver) to structure project submissions, task assignments and approvals.
- Built HOD and C-Suite approval workflows, GCEO monitoring visibility and centralized tracking of progress, responsibilities and approval statuses across nine departments.

AR MicroLearn | Degree Final Year Project, UniSZA (Gold Award)

- Developed an AR educational application featuring 15+ microorganisms aligned with the Malaysian Year 6 KSSR Science syllabus, using Vuforia image tracking to display interactive 3D models from physical flashcards.

Gym Management System | Diploma Final Year Project, UTeM

- Developed a C#/.NET desktop application with a relational SQL database supporting 100+ member records, automating registration, record management and membership tracking.
- Performed functional testing, debugging and database validation in Visual Studio 2022 to check application behavior and record consistency.

SKILLS

IT Support: Windows 10/11 imaging, hardware and software troubleshooting, user access support, Microsoft 365, laptop and desktop provisioning, BIOS/boot configuration, driver installation
Networking: Structured cabling, RJ45 termination, patch panels, network racks, cable testing and tracing, network troubleshooting
Development: PHP, MySQL, SQL, HTML, CSS, C#/.NET, relational database design, role-based access control (RBAC), system testing, Vuforia (AR), Visual Studio 2022
Data: Microsoft Power BI, DAX, data modeling, interactive dashboards (HRD Corp training, Aug 2025)

AWARDS

- Gold Award, Final Year Project Showcase, UniSZA
- Silver Award, Minggu Penyelidikan & Inovasi (MPI) 2026
